Explanation of Symbols used :—C=Cases ; D=Deaths.

NEW DELHI 3 (INDIA) ;  
The 2nd January, 1951.

S. P. JAIN,  
for Registrar General, India.

# NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 5,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

**TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT**

\*In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

† Figures not available.

Explanation of symbols used :—B.—Births ; B.R.—Birth rate ; C.—Cholera ; S.—Smallpox ; P.—Plague ; F.—Fever ; D. D.—Dysentery and Diarrhoea ; R.D.—Respiratory diseases ; M.D.—Maternal Deaths ; D.R.—Death rate ; I.D.—Infantile Deaths (included in total deaths).

## REMARKS

The figures of births and deaths shown in this statement for week ending the 9th December, 1950, relate to 160 towns with an estimated population of 18,994 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 69% of the total number of towns representing 67% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 16,373 and 7,821 representing birth and death rates of 44.8 and 21.4 per thousand of population respectively.

(A) *States (Parts A & C).*—The data here relate to 138 towns with an estimated population of 16,445 thousands. Information about West Bengal, Assam, Bihar and Madhya Pradesh could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 69% of the total number of towns representing 67% of the total population is covered. The numbers of births and deaths were 14,581 and 7,039 representing birth and death rates of 46.1 and 22.3 per thousand of population respectively. The table at the end gives the position by States.

Pandharpur in Bombay and Aruppukotai, Tuticorin, Rajapalayam, Ooty, Tirunelveli and Palam Cottah in Madras

recorded high death rates of 50.6, 75.1, 66.5, 57.9, 55.0, 52.8 and 52.0 respectively per one thousand population. The high death rate in Pandharpur was mainly due to deaths from fevers and respiratory diseases. Deaths from cholera were recorded by all these towns except Ooty in Madras State but they were disproportionately heavy in Palam Cottah and Rajapalayam. In Aruppukotai the biggest number of deaths were recorded under fevers. In all other towns deaths from respiratory diseases were heavy. Dysentery and diarrhoea accounted for a fairly large number of deaths in Rajapalayam and Tirunelveli.

(B) *States (Part B).*—The data here relate to 22 towns with an estimated population of 2,549 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 69% of the total number of towns representing 70% of the total population is covered. The numbers of births and deaths were 1,792 and 782 representing birth and death rates of 36.6 and 16.0 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
